

# The Oak Oracle

As we reach the end of this half-term, it's a wonderful opportunity to reflect on all the exciting learning experiences we've shared in class.

In Maths, we have explored a variety of topics that have truly engaged our minds. One of the highlights was our fun with the coordinate grid. Everyone worked diligently on converting different measurements, such as litres to millilitres, which was a fantastic way to apply our knowledge in practical scenarios. We have also lovingly been using Fridays as 'Arithmetic Fridays' to develop our formal written methods

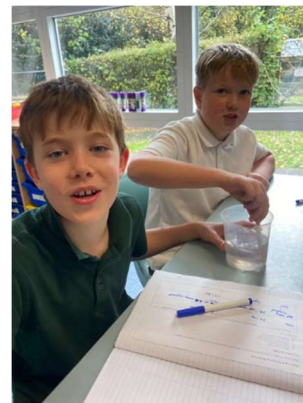

Moving on to English, we had a fantastic time with the project "Can We Save the Tiger?" where we created informative fact files on extinct animals. This project sparked curiosity but also encouraged research skills. We also delved into Emma Carroll's "A Night at the Frost Fair," using it as inspiration to craft our own timeslip narratives. Lastly, we analysed the 2013 Cadbury's advert, which led us to write engaging non-fiction newspaper articles, showcasing our creativity and understanding of persuasive writing.

In Geography, we enjoyed an immersive study of volcanoes and earthquakes. The children had a blast re-enacting these natural phenomena, drawing diagrams, and identifying their impacts on the world around us. This hands-on approach really brought the subject to life!

In Religious Education, we explored the concept of 'Incarnation'. We discussed the significance of the Messiah and why Christians recognise Jesus in this role. Oak Class even performed a class assembly for the rest of the school, sharing their insights and learning with everyone.

Finally, in Science, we had an exciting time experimenting with different substances. We boiled, melted, froze, tore and transformed various materials, which allowed us to witness the fascinating changes that occur in our everyday world.

This half-term has been filled with learning and I am so proud of all the hard work and enthusiasm shown by our children!
