

The Beech Bugle

Beech Class has had a truly wonderful term exploring the theme *"Where will the adventure take us?"* We began our learning by taking an imaginary rocket into space, looking back at our amazing planet from the stars. The children enjoyed learning about the different continents, places around the world and a wonderful range of animals. They then turned their attention to the planets, stars and the moon, asking thoughtful questions and showing great curiosity throughout.

The children have loved exploring imaginary places and listening to adventure stories, using their imaginations to create exciting journeys and new worlds. Alongside this, we have also been thinking about their next adventure into Year 1 and preparing carefully for the changes ahead. The children have reflected on their first year in school and have shown real pride in the

progress and journey they have achieved so far. It has been lovely to see them growing in confidence and independence.

This term, the children have also learned about plants and pollination, including a very special visit from a local beekeeper, which helped bring their learning to life. They asked thoughtful questions and showed keen interest in the important role bees play in nature.

We have also enjoyed the sunny weather during our Forest School sessions. The children have used tools safely and sensibly as they began making green wood crafts, developing their practical skills and enjoying the outdoor environment.

Beech Class have worked hard, embraced every adventure and shown wonderful enthusiasm across the term.
